Step 1 — Screen

- Place the Surface Book on a table with the camera towards you. Place the metal spudgers in the indentations located on the top of the screen.

Step 2

- Use the spudgers to gently pry the screen apart from the back of the Surface Book. Open carefully, ensuring to not disconnect ribbons on the back side.

 Be careful not to rip the ribbons in the back out.

Step 3

Step 4

- Next, remove the metal shield covering the other ribbon. Then remove the ribbon.

To reassemble your device, follow these instructions in reverse order.
